Trench Safety Tips

- **Locate utilities before you dig**
- **Enter only sloped, shored, or shielded trenches.**
- **Control water accumulation**
- **Use ladders or ramps to enter/exit.**

Know Before You Go

Before trenching, ask: What's the soil type—A, B, or C? Is water present? Are there nearby vibrations from traffic or equipment? Remember, one cubic yard of soil can weigh as much as a pickup truck—up to 3,000 lbs. Stay safe with proper precautions.
